

Biocleanse kills, and kills fast.

THE replacement for phenolic biocides

Proven efficacy against mycobacterium tuberculosis in the presence of protein*

Fully compliant with the Biocidal Products Regulations, Biocleanse is proven effective against a wide range of pathogenic bacteria and viruses including TB, MRSA, HIV, C diff, HBV, E coli, Salmonella, Listeria, Candida, Penicillium and Avian Flu etc.

Teknon Biocleanse is the solution.

Safe to use on ferrous and non-ferrous metals, ceramics, glassware and plastics, able to penetrate oils, fats and protein based materials, Biocleanse cuts through contaminants, lifting them from surfaces and leaving a physically clean and disinfected surface in a single operation.

Teknon Biocleanse is available in ready-to-use, concentrate and wipe variants. It has the power to protect in a formulation that's safe and easy to handle too.
